THE GLIDE STORY

Slide the wall away

The SASHWAY 600 Series Aluminum Thermal Break Sliding Door turns a simple opening into a wide, uninterrupted wall of glass. Built on a heavy-duty 135 mm thermal-break aluminum frame with integrated hardware, the system is engineered for large openings where strength, weather performance, and smooth operation matter most.

Every Glide 600 Series sliding door is built to order: choose two-track or three-track configurations, high or low threshold profiles, copper or standard tracks, the glass package, and the finish.
