THE AWNING STORY

Lift the wall. Serve the counter.

The Canopy Hydraulic 100 Series turns an ordinary kitchen window into a full pass-through counter. Dual hydraulic actuators raise the top-hinged sash a full 90 degrees and hold it overhead, opening the wall while the raised sash doubles as a weather canopy over the serving counter.

Order it with a bottom frame for a traditional awning install — or specify the no-bottom-frame version and run your countertop straight through the opening for a true indoor-outdoor bar. Top-integrated pull handles make the sash effortless to operate, and the factory-built insect screen keeps bugs out while the breeze comes in. Built to order: choose the configuration, the glass, and the finish.
