THE FOLD-UP STORY

Fold the wall. Open the bar.

The LIFT 100 Series Fold-Up Window turns an ordinary opening into a wide-open pass-through. The top-hinged sash folds upward in one smooth motion and holds at any height — fully open for a true indoor-outdoor counter, half open for ventilation, or anywhere in between.

Order it with a bottom frame for a traditional window installation — or specify the no-bottom-frame version and run your countertop straight through the opening for a true indoor-outdoor bar. Heavy-duty hardware lets the folding panels stop in any position, and the retractable screen keeps bugs out while the breeze comes in. Built to order: choose the configuration, the glass, and the finish.
